PROJECTS

Web based weather forecast
Developed a responsive weather forecasting website that provides real-time weather updates based on user location or manual city input. Integrated the OpenWeatherMap API to fetch and display temperature, humidity, wind speed, and weather conditions. Implemented a clean, user-friendly UI with interactive search functionality and dynamic icons. Focused on responsive design principles to ensure optimal performance across desktop and mobile devices.

DECLARATION

I hereby declare that the above-mentioned information is correct and true to the best of my knowledge.
